10. The data was scraped from the ESPN website. Go to
<https://www.espn.com/wnba/team/schedule/_/name/atl/season/2008> and click on the first two scores recorded in the 'RESULT' Section. What is different about the pages these links take you to? How might this be causing the problem?

11. What are some ways we could solve this problem if we still wanted to create the table originally indicated? Choose a way and make a table with your new data.
